SUMMARY

Full Stack Engineer with **4+ years** of experience developing large-scale fintech and enterprise applications for loan management and banking operations. Skilled in **Angular**, **Java Spring Boot**, **Node.js**, and **microservice architectures**, with expertise in workflow automation, **RESTful API** development, state management, and performance optimization. Experienced in building secure, scalable, and production-grade systems within **Agile** environments for financial domain applications.

TECHNICAL SKILLS

- **Frontend:** Angular (v19/20), React, HTML5, CSS3, Tailwind CSS, Bootstrap, Angular Material, jQuery
- **Backend:** Node.js (Express.js), Java (Spring Boot)
- **Database:** MySQL, MongoDB
- **Programming Languages:** JavaScript (ES6+), TypeScript, Java, Python
- **Cloud:** AWS S3, Google Cloud Platform (Cloud Storage)
- **Tools:** Git, Postman, VS Code, Jira

EXPERIENCE

- **Software Development Engineer - I** | *GetVantage, Mumbai* **July 2024 – July 2026**
 - Independently built the frontend of a loan management platform from scratch using **Angular (v19/20)**, **NgRx**, and **Angular Signals**, including authentication, routing, and report generation.
 - Built **RESTful APIs** and **microservices** using **Node.js** and **Express**, and automated secure document submission to partner **NBFC** platforms.
 - Optimized filtering performance using **RxJS** operators (e.g. **debounceTime**) on the frontend and **Node-cache** on the backend, reducing unnecessary API calls and improving response times.
 - Designed **Maker-Checker approval workflows** and a **CRM-based** lead management module, reducing manual validation errors and streamlining lead tracking.
 - Optimized **MongoDB** aggregation pipelines, cutting report generation time by **45%**.
 - Built reusable **Angular** components and implemented cloud-based document storage using **Amazon S3** and **Google Cloud Storage**.
- **Developer, Reserve Bank of India** | *Tata Consultancy Services, Mumbai* **June 2019 – June 2021**
 - Developed enterprise web applications for the Reserve Bank of India's **CAS** platform using **Angular** and **Spring Boot**.
 - Built responsive Angular modules with **Angular Material** and **Reactive Forms**, implementing advanced filtering and navigation that improved usability for operational teams.
 - Designed **RESTful APIs** using **Java Spring Boot** and **Hibernate/JPA**, and optimized **SQL** queries for efficient backend processing.
 - Reduced initial load time by implementing **lazy loading** and **code splitting** with Angular Router.
 - Integrated **NgRx** for scalable state management and built reusable Angular services to improve modularity.

PROJECTS

- **Book Sharing Website** | *React, Node.js, MongoDB*
 - Designed application wireframes and UI flow using **Google Stitch** before development, translating designs into a responsive **React** single-page application.
 - Built reusable custom **React Hooks** (useState, useEffect, useContext) and used **React Router** for protected routes and dynamic navigation.
 - Implemented **JWT**-based authentication with a complete auth flow, including protected routes and session management for a seamless login experience.
 - Integrated **RESTful APIs** using **Axios** and custom hooks, including the **Google Books API** for real-time search across over one million books with dynamic filtering.
 - Built the backend using **Node.js**, **Express.js**, and **MongoDB**, implementing **CRUD** operations and data validation for persistent storage.

EDUCATION

- **Conestoga College, Canada** **April 2023**
Post Graduation Diploma in Web Development GPA: 3.9/4.0
- **University Of Mumbai, India** **May 2019**
Bachelor of Engineering in Electronics & Telecommunication GPA: 7.25/10
